

AbsoluteClimo and AKR Zell Add ERS To Their Clientele

HONOLULU, SINGAPORE, BASEL – (24 May 2021) - AbsoluteClimo and AKR Zell announce today they are providing state-of-the-art climate-finance prediction modeling and risk transfer analytics services to ERS Administration Services Ltd., domiciled in Bermuda, which earlier this year [announced](#) its (re)insurer aligned investment strategy with ERS ILS Ltd.

AbsoluteClimo and AKR Zell [announced](#) their strategic partnership this past January to provide the Insurance-linked securities (ILS), insurance and reinsurance industry with climate-driven risk services, with an emphasis on providing independent views of risk and addressing climate-related gaps unfulfilled by traditional industry tools.

ERS ILS Ltd. will benefit from AbsoluteClimo's consistently skillful global climate physics and financial forecast models combined with AKR Zell's actuarial expertise and risk transfer experience.

"With investors increasingly restless about the price of climate, AbsoluteClimo is pleased to support ERS's new strategy with Clim©Cats and our world-first business model pegged to forecast accuracy," said Brendan Lane Larson, AbsoluteClimo Co-Founder CEO and Climatologist.

"It is refreshing to see ERS ILS Ltd. determined to take a different approach. There is a disconnect between stochastic modeling and forward predicting. We are delighted our bespoke services have been selected by ERS ILS Ltd. to provide the missing piece and close the gap," added Andreas Karl Robert Zell, Managing Director at AKR Zell Pte. Ltd.

About AbsoluteClimo LLC

AbsoluteClimo (absoluteclimo.com) is a leading global climate-finance modeling, forecasting and risk management firm. Our mission is bettering life on Earth (©) by helping businesses impacted by climate variability and change. We operate the world's first and only financial models, Clim©Cats™, linked to consistently skillful global climate physics and machine learning predictions. G©TCHA™ is our pole-to-pole skillful climate physics forecast model built from scratch, which uniquely includes major earthquakes and volcano predictions, and is independent of limited skill government and university climate models.
